

Internal Quality Assurance Cell

Report of Workshop on Student Centric Methods

26.09.2022

IQAC is conducting Internal Academic Audit on Teaching Learning Process on continuous basis. During the Audit it has been observed that the implementation of Student Centric Methods is at various levels across the institution. The interpretation of the term “Student Centric Method” varies from Department to Department and Faculty member to Faculty Member within the Department.

To overcome the above issues, IQAC organized an Orientation Programme on Student Centric Methods in the form of Workshop to the Heads of the Departments on 24th September 2022 at MBA Seminar Hall. In total 28 Faculty Members participated in the programme.

Dr. V. J. Vijayalakshmi, Asst. Professor, Department of Electrical and Electronics Engineering was the Resource Person.

The Director, IQAC Dr. S. Ravi welcomed the Resource Person and the Participants. He briefed the purpose and objective of organizing this programme. He stressed the need for making the learning by students an effective one through implementation of Student Centric Methods. Recording of applying the Student Centric Methods in the log book is also very much essential, he added.

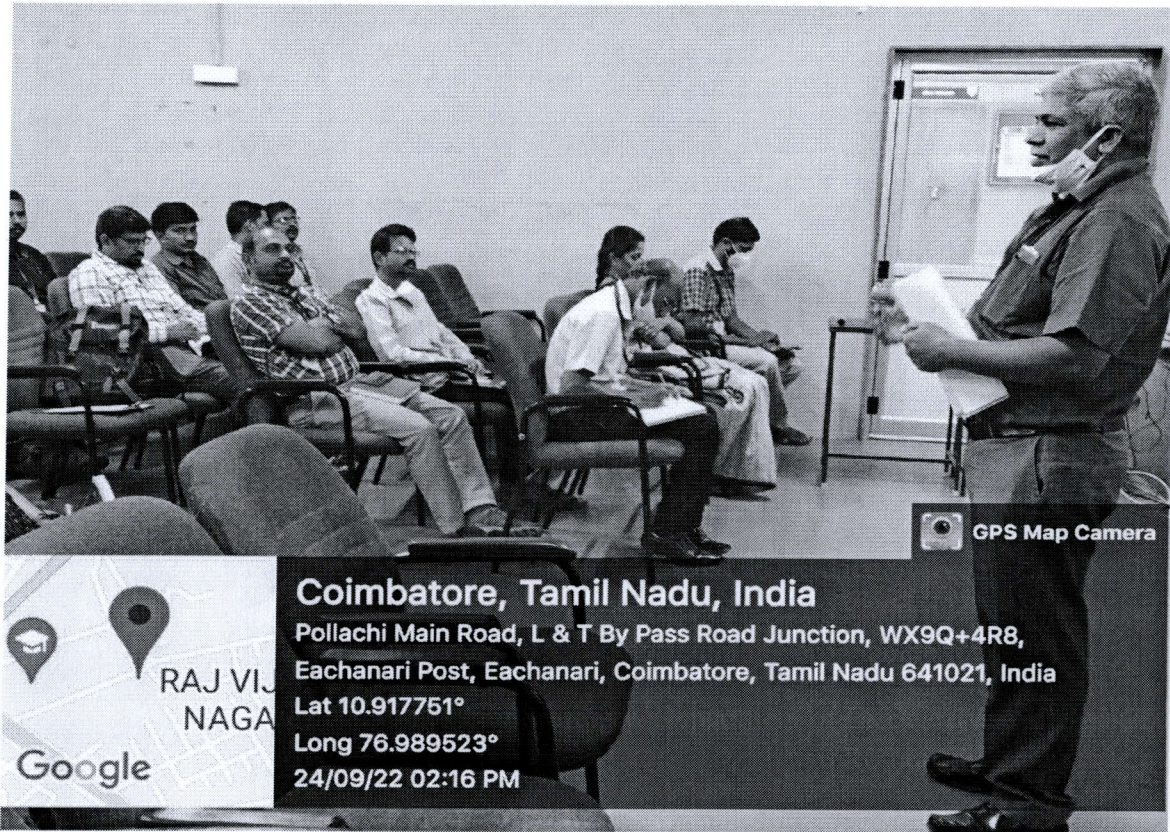

The Resource Person made her presentation under the title “Teaching and Learning Methodologies” covering the following sub titles:

1. Learning Outcomes
2. Models of Teaching
3. Different types of Teaching Methods
4. Relation between Course Outcomes and Teaching Methods
5. Taxonomy of Learning
6. Knowledge Categories
7. Different types of Learning
8. Different types of Assessment

The session was made interactive and participative and the queries raised by the Faculty Members were clarified by the Resource Person.

The Coordinator, IQAC Mr. T. Shanmugavel rendered Vote of Thanks and the session came to an end at 4.15.pm.
