Criterion 1.2.2.1 Number of courses in which CBCS/Elective Course system was implemented

Additional information

Academic flexibility is the need of the hour and to facilitate student learning based on their choice and interest newer courses have the CBCS and elective options. This enhances student interest in academic and research activities as they have the flexibility to choose course from several courses. This also integrates several disciplines and provides interdisciplinary approach. The choice and elective courses have attracted students. Eventhough there are 8 8 programmes during the period 2015-2019, in the current year (2019-2020) there are 85 programmes and all the programmes come under CBCS.

Programmes with CBCS/Elective course pattern:

The education system has to transform and/or redesign to meet the challenges of today's world. This can be possible only by introducing innovations and developing "learner-centric approach" as with the CBCS and elective pattern. This allows flexibility as well as caters to the diverse needs of student population. This pattern is student centric and facilitates interdisciplinary courses in addition to skill development. Our University is always in the forefront to lead the change and hence introduced CBCS and elective pattern in several courses across various disciplines as mentioned below:

Approach

•The courses in Commerce, Management, basic sciences, computer science & life sciences have CBCS and elective option

• All the Enginering, Architecture and Pharmacy programmes also have CBCS pattern to provide wider option for students to choose their courses based on their interest and relevant areas

•Student centric approach

•Elective options provides opportunity to enrich and enhance knowledge and skill for students by electing for the course

Outcomes

•Inter professional education enhances student knowledge

•Inter disciplinary approach to academic and research activities

•Students are benefitted by problem based learning by integrating of various disciplines

•Skill development in all areas
