

Department of Microbiology Report of the Event

Workshop on “Screening of microbial metabolites- I” 17th August 2017

The first workshop on Screening of Microbial Metabolites was conducted by Department of microbiology at PG laboratory at 10:00 A.M 17.08.2017. The event was inaugurated by **Dr. R. Usha**, Associate Professor and the students were welcomed. The Technical sessions were handled by **Dr. S. Ramalakshmi** on “Industrial microbiology-An overview” and **Dr. P. Srinivasan** on “Endophytic fungi and active metabolites” respectively. About 40 participants from various colleges, UG, PG students of Microbiology and Biochemistry participated in the two days event. The techniques involved the screening, isolation and characterization of secondary metabolites of entophytes isolated from plant sources. They were given hands-on-training on all the techniques. The participants had a clear idea on sources of secondary metabolites and enzymes and its production. The valedictory function was at 4:00 P.M on 17.08.2017 and students feedback on the program was recorded.

Participants: 51 students
