	SPSS				

Course Objectives

- ✤ To educate students on purpose of applying various statistical tools
- To train students on method of carrying out statistical analysis with the help of SPSS

Learning Course

- ✤ Assists students to carry out statistical analysis for their project
- 1. Descriptive Statistics
- 2. Chi-square
- 3. Independent Sample 't' Test
- 4. Paired 't' Test
- 5. Analysis of Variance (ANOVA)
- 6. Karl Pearson Correlation
- 7. Spearman Rank Correlation
- 8. Regression
- 9. Factor Analysis
- 10. Kolmogorov and Smirnov test
- 11. Mann Whitney U Test
- 12. Wilcoxon Test
- 13. Friedman Rank Test
- 14. Kruskal Wallis H-Test
- 15. Garett Ranking

Descriptive Statistics

MOENY OF HIGHER

Enable | Enlighten | Enrich (Deemed to be University) (Under Section 3 of UGC Act 1956)

KARPAGAM ACADEMY OF HIGHER EDUCATION

(Deemed University Established Under Section 3 of UGC Act 1956) Coimbatore - 641021. (For the candidates admitted from 2016 onwards) DEPARTMENT OF COMMERCE

SUBJECT : SPSS SEMESTER : III SUBJECT CODE: 16CCP312

CLASS : II M.Com. (CA)

Ex.No.1

DESCRIPTIVE STATISTICS

Aim

To compute Mean, Median, Mode and Standard Deviation

Algorithm

Step 1:	Start the Process
Step 2:	Type the following Quantitative Data 320, 395, 342, 444, 551, 395, 425, 417,
	395, 401, 390, 400 in Column Variable 1 of Data view window
Step 3:	Select Descriptive Statistics option from Analyze Menu
Step 4:	Select Frequencies option from Descriptive Sub menu
Step 5:	Forward the Variable 1 data to Variables Window
Step 6:	Select Statistics Command button on Frequencies window
Step 7:	Select Mean, Median and Mode from Central Tendency Option and Standard
	Deviation from Dispersion option and click Continue command button
Step 8:	Click Ok button on Frequency Window
Step 9:	Stop the process

Result

The above statistical analysis has been verified by using SPSS Package.

Statistics						
VAR000	VAR00001					
N	12.00					
	0.00					
Mean	406.25					
Median	Median					
Mode	395.00					
Std. Dev	56.51

Ex.No.2

Chi-square

Aim

To calculate Chi-square test to find association between two variables

Algorithm

Step 1:	Start the Process
Step 2:	Type two set of Qualitative data on Variable 1 and Variable 2 on Data View
	Window
Step 3:	Specify names for Variable 1 and Variable 2 on variable view window
Step 4:	Select Descriptive Statistics option from Analyze Menu
Step 5:	Select Crosstabs from Descriptive Sub menu
Step 6:	Forward Variable 1 to Row and Variable 2 to Column options
Step 7:	Click Statistics Command button on Crosstab window, from which select
	Chi-square option and press continue command button
Step 8:	Click Cell command button on Crosstab window, in which select row on
	percentage option and press continue command button
Step 9:	Click Ok button on Crosstab window
Step	Stop the process
10:	

Result

The Chi-square test result has been verified by using SPSS Package.

Independent Sample 't' Test

Aim

To calculate 't' test to find whether mean differs between two groups

Algorithm

Step 1:	Start the Process
Step 2:	Type Quantitative data on Variable 1
Step 3:	Group the Quantitative data in to two groups by assigning qualitative values
	(i.e.) 1,2
Step 4:	Select Compare Means from Analyze Menu
Step 5:	Select Independent Sample 't' Test from Compare Means menu
Step 6:	Forward Quantitative data to Test Variables Option and Qualitative data to
	Group Variables option
Step 7:	Click Define Groups command button and assign 1 and 2 at Group 1 and
	Group 2 and click continue command button
Step 8:	Click Ok button on Independent Sample 't' test window
Step 9:	Stop the process

Result

The above statistical analysis has been verified by using SPSS Package.

CLASS : II M.Com. (CA)

Ex.No.7

Spearman Rank Correlation

Aim

To compute Spearman rank correlation to ascertain nature of relation that exists between two set of evaluators

Algorithm

Step 1:	Start the Process
Step 2:	Type students marks evaluated by two different faculty at Variable 1 and Variable 2
Step 3:	Select Correlate option from Analyze Menu
Step 4:	Select Bivariate command option from Correlate sub menu
Step 5:	Forward all the variables marks of students to variables window
Step 6:	Click Spearman option on Correlation Coefficient option
Step 7:	Click Ok button on Bivariate Correlation window
Step 8:	Stop the process

Result

Thus spearman rank test analysis has been verified by using SPSS Package.

Nonparametric Correlations

		Correlations

Ex.No.8

Regression

Aim

To ascertain the combined influence of select independent variables over dependent variable, regression test is employed

Algorithm

Step 1:	Start the Process
Step 2:	Type Dependent variables data on variable 1 and independent variables data on variable 2, variable 3 etc.,
Step 3:	Select Regression option from Analyze Menu
Step 4:	Select linear command option from regression sub menu
Step 5:	Forward Dependent variable to Dependent option and Independent variables
Stop 6:	Click Ok button on Linear Pagression window
Step 0.	Click OK button on Linear Regression window
Ster 7.	
Step /:	Stop the process

Result

Thus regression test has been verified by using SPSS Package.

VAR00029	.315	.351	.028	.088	.173	.639	017	

Extraction Method: Principal Component Analysis.

Rotation Method: Varimax with Kaiser Normalization.

a. Rotation converged in 15 iterations.

Kolmogorov and Smirnov Test 2016-2018 Batch

KARPAGAM ACADEMY OF HIGHER EDUCATION

(Deemed University Established Under Section 3 of UGC Act 1956) Coimbatore - 641021. (For the candidates admitted from 2016 onwards) DEPARTMENT OF COMMERCE

SUBJECT: SPSSSEMESTER: IIISUBJECT CODE:16CCP312

CLASS : II M.Com. (CA)

Ex.No.10

Kolmogorov and Smirnov Test

Aim

To test whether the data is normally distributed or uniformly distributed

Algorithm

Step 1:	Start the Process
Step 2:	Type qualitative data on data view window
Step 3:	Select Non Parametric Test Option from Analyze Menu
Step 4:	Select 1 Sample KS command option from Non Parametric Test sub menu
Step 5:	Forward all the variables to Test variables list window
Step 6:	Click poisson option at Test distribution
Step 7:	Click Ok button on One Sample Kolmogorov Smirnov test window
Step 8:	Stop the process

Result

Thus Kolmogorov Smirnov analysis has been verified by using SPSS Package.

	One-Sample Konnogorov-Simmov Test				
		VAR00001	VAR00002	VAR00003	VAR00004
N	-	30	30	30	30
Normal Parameters ^a	Mean	1.1333	3.2000	3.8000	1.8667
	Std. Deviation	.34575	.40684	.40684	.34575
Most Extreme Differences	Absolute	.517	.488	.488	.517
	Positive	.517	.488	.312	.350
	Negative	350	312	488	517
Kolmogorov-Smirnov Z		2.831	2.676	2.676	2.831
Asymp. Sig. (2-tailed)		.000	.000	.000	.000
a. Test distribution is Norma	l				

One-Sample Kolmogorov-Smirnov Test

One-Sample Kolmogorov-Smirnov Test 2

		VAR00001	VAR00002	VAR00003	VAR00004

Most Extreme Differences	Absolute	.322	.380	.332	.310
	Positive	.180	.219	.332	.287
	Negative	322	380	273	310
Kolmogorov-Smirnov Z		1.763	2.081	1.819	1.698
Asymp. Sig. (2-tailed)		.004	.000	.003	.006
a. Test distribution is Poisson.					

Mann Whitney U Test 2016-2018 Batch

KARPAGAM ACADEMY OF HIGHER EDUCATION

(Deemed University Established Under Section 3 of UGC Act 1956) Coimbatore - 641021. (For the candidates admitted from 2016 onwards) DEPARTMENT OF COMMERCE

SUBJECT : SPSS SEMESTER : III SUBJECT CODE: 16CCP312

CLASS : II M.Com. (CA)

Ex.No.11

Mann Whitney U Test

Aim

To test whether two independent samples are drawn from the same population or not

Algorithm

Step 1:	Start the Process
Step 2:	Type Quantitative data on variable 1 and qualitative data on variable 2 for grouping of data
Step 3:	Select Non Parametric Test Option from Analyze Menu
Step 4:	Select 2 Independent Sample option from Non Parametric Test sub menu
Step 5:	Forward variable 1 to Test Variable list
Step 6:	Forward variable 2 to Grouping variables
Step 7:	Click Define group command button and type qualitative data entered in
	Group 1 and Group 2 and click command button
Step 8:	Click Ok button on 2 Independent Sample test window
Step 9:	Stop the process

Result

Thus Mann Whitney U Test has been verified by using SPSS Package.

		Ranl	KS	
	VAR00			
	002	Ν	Mean Rank	Sum of Ranks
VAR00001	1	15	12.90	193.50
	2	12	15.38	184.50
	Total	27		

Test Statistics^b

	VAR00001
Mann-Whitney U	73.500
Wilcoxon W	193.500
z	806
Asymp. Sig. (2-tailed)	.420
Exact Sig. [2*(1-tailed Sig.)]	.427 ^a

a. Not corrected for ties.

b. Grouping Variable: VAR00002

(Deemed University Established Under Section 3 of UGC Act 1956) Coimbatore - 641021. (For the candidates admitted from 2016 onwards) DEPARTMENT OF COMMERCE

SUBJECT : SPSS SEMESTER : III SUBJECT CODE: 16CCP312

CLASS : II M.Com. (CA)

Ex.No.12

Wilcoxon Test

Aim

To test whether ranks given by two faculties are similar

Algorithm

Step 1:	Start the Process
Step 2:	Type Quantitative data on variable 1 and variable 2
Step 3:	Select Non Parametric Test Option from Analyze Menu
Step 4:	Select Two Related Sample option from Non Parametric Test sub menu
Step 5:	Forward variable 1 and variable 2 to Test Pair window
Step 6:	Click Ok button on 2 Independent Sample test window
Step 7:	Stop the process

Result

Thus Wilcoxon Test has been verified by using SPSS Package.

	Ran	iks		
		Ν	Mean Rank	Sum of Ranks

Friedman Rank Test 2016-2018 Batch

KARPAGAM ACADEMY OF HIGHER EDUCATION

(Deemed University Established Under Section 3 of UGC Act 1956) Coimbatore - 641021. (For the candidates admitted from 2016 onwards) DEPARTMENT OF COMMERCE

SUBJECT : SPSS SEMESTER : III SUBJECT CODE: 16CCP312

CLASS : II M.Com. (CA)

Ex.No.13

Friedman Rank Test

Aim

To identify significant factors among set of factors introduced

Algorithm

Step 1:	Start the Process
Step 2:	Type Quantitative data on variable 1, variable 2 etc.,
Step 3:	Select Non Parametric Test Option from Analyze Menu
Step 4:	Select K Related Sample option from Non Parametric Test sub menu
Step 5:	Forward all the variables to Test variables window
Step 6:	Click Ok button on Test for Several related samples window
Step 7:	Stop the process

Result

Thus Friedman Test has been verified by using SPSS Package.

Friedman Rank Test	2016-2018 Batch

Kruskal Wallis H-Test 2016-2018 Batch

KARPAGAM ACADEMY OF HIGHER EDUCATION

(Deemed University Established Under Section 3 of UGC Act 1956) Coimbatore - 641021. (For the candidates admitted from 2016 onwards) DEPARTMENT OF COMMERCE

SUBJECT: SPSSSEMESTER: IIISUBJECT CODE:16CCP312

CLASS : II M.Com. (CA)

Ex.No.14

Kruskal Wallis H-Test

Aim

To identify whether mean differs among various group of respondents

Algorithm

Step 1:	Start the Process
Step 2:	Type Quantitative data on variable 1
Step 3:	Type Qualitative data on variable 2 for grouping of data
Step 4:	Select Non Parametric Test Option from Analyze Menu
Step 5:	Select K Independent Sample option from Non Parametric Test sub menu
Step 6:	Forward Quantitative variable to Test Variable List
Step 7:	Forward Qualitative variable to Grouping Variable
Step 8:	Type Minimum and Maximum variables on Grouping Window and click
	continue button
Step 9:	Click Ok button
Step 10	Stop the process

Result

Thus Kruskal Wallis Test has been verified by using SPSS Package.

Garrett Ranking Test 2016-2018 Batch

KARPAGAM ACADEMY OF HIGHER EDUCATION

(Deemed University Established Under Section 3 of UGC Act 1956) Coimbatore - 641021. (For the candidates admitted from 2016 onwards) DEPARTMENT OF COMMERCE

SUBJECT : SPSS SEMESTER : III SUBJECT CODE: 16CCP312

CLASS : II M.Com. (CA)

Ex.No.15

Garrett Ranking

Aim

To rank the variables or factors on the basis of order of importance Garett Ranking test is employed.

Algorithm

Step 1:	Start the Process
Step 2:	Type 'n' number of numbers according to number of variables considered for
	the study
Step 3:	Subtract the 'n' number with 0.5
Step 4:	Result obtained from subtraction are to be multiplied by 100
Step 5:	Divide the multiplied values with 'n' numbers
Step 6:	By ascertaining Garett ranking table, weightage may be assigned for 'n' numbers
Step 7:	Calculate simple frequency for the variables
Step 8:	Multiply simple frequency values with weightage, obtained from Garett ranking table
Step 9:	Add all the multiplied values and divide the same from 'n' numbers
Step 10	Resultant output may be ranked in descending order
Step 11:	Stop the process

Result

Thus Garett ranking test has been computed

Garrett Ranking Test 2016-2018 Batch

Decemintion	Ι	II	III	IV	V	VI	VII	Total	Total	Mean	Rank
