

**REPORT ON TWO DAYS
HANDS-ON TRAINING PROGRAM
ON
"MOBILE SERVICING AND TRAINING"
Held on 3.01.2019 and 4.01.2019**

It is an unavoidable fact that smart phones can, and do, break. When they do, people want to get them repaired, but often the only option they have is to take their device back to wherever they purchased it from and have the merchant return it to the manufacturer. This process of sending it away, having it repaired, and sending it back can take days, or sometimes weeks if the fault is serious, and this can be frustrating and inconvenient for the owner. Being able to repair smartphones for people in your local area could give you a great opportunity to start your own business, or add a repair service on your own.

In this regard, students of Department of Physics have actively taken hands-on training for two days for Mobile servicing and Training. The program has been conducted by the Department of Physics in tie-up with NEW TECHNOLOGY (ISO-9001:2015 CERTIFIED INSTITUTION) MOBILE SERVICE AND TRAINING INSTITUTE", Coimbatore on 3.1.2019 and 4.01.2019. The program went on successfully and by the end of the program, the students are able to repair their own Smartphone and also identified the problems in the repaired smart phones. This training program made students to learn everything they need to about how smart phones work and how to be able to repair them.
