

## Biofuels and Biomass

**Effect of compression ratio on combustion performance  
and emission characteristic of a DI diesel engine  
fueled with upgraded biogas-KME-DEE port injection**

Debabrata Barik, Asit Kumar, and S. Murugan

*Energy Fuels*, **Just Accepted Manuscript** • DOI: 10.1021/acs.energyfuels.7b01977 • Publication Date (Web): 19 Mar 2018Downloaded from <http://pubs.acs.org> on March 20, 2018**Just Accepted**

"Just Accepted" manuscripts have been peer-reviewed and accepted for publication. They are posted online prior to technical editing, formatting for publication and author proofing. The American Chemical Society provides "Just Accepted" as a service to the research community to expedite the dissemination of scientific material as soon as possible after acceptance. "Just Accepted" manuscripts appear in full in PDF format accompanied by an HTML abstract. "Just Accepted" manuscripts have been fully peer reviewed, but should not be considered the official version of record. They are citable by the Digital Object Identifier (DOI®). "Just Accepted" is an optional service offered to authors. Therefore, the "Just Accepted" Web site may not include all articles that will be published in the journal. After a manuscript is technically edited and formatted, it will be removed from the "Just Accepted" Web site and published as an ASAP article. Note that technical editing may introduce minor changes to the manuscript text and/or graphics which could affect content, and all legal disclaimers and ethical guidelines that apply to the journal pertain. ACS cannot be held responsible for errors or consequences arising from the use of information contained in these "Just Accepted" manuscripts.
